

INFORMATION SHEET

HOLIDAY FLOTELS INC.
DBA PACKERS BAY MARINA AND
U.S. DEPARTMENT OF AGRICULTURE, FOREST SERVICE
SHASTA COUNTY

Holiday Flotels Inc. dba Packers Bay Marina operates under a Special Use Permit from the U.S. Department of Agriculture, Forest Service. Existing marina facilities include rental of 26 commercial houseboats; a service dock with floating fuel barge, sewage/solid waste barge, store, office/floating sanitary facilities, and minor boat repair shop. Existing land-based facilities include on permanent residence, public sanitary facilities, maintenance building, parking area, and access road. No private land ownership is associated with the Packers Bay Marina operations.

Packers Bay Marina generates a variable quantity of domestic sewage, from houseboat pumpouts and sanitary facilities, during the months of May through October. The wastewater is pumped to a 1,000-gallon containment barge, until it can be moved to shore and transferred to a 1,000-gallon transfer truck. Up to 1,872 gallons of wastewater may be pumped to the on-site treatment/disposal system per day. Any additional wastewater is transported to a 3,200-gallon holding tank, which is emptied periodically and transported to a septage receiving facility, such as the Redding Regional Septage Disposal Facility, operated by Shasta County.

Other wastes may be discharged to Shasta Lake as a result of marina operations such as the refueling of vessels, storage of fuel and chemicals, and maintenance of the facilities including cleaning, washing, and refurbishing of rental houseboats. Fuel is stored in a 3,400-gallon tank encompassed by a secondary steel flotation tank. Several monitoring ports were installed to allow access to each floatation chamber and the bottom of the tank. Two land-based above ground storage tanks are utilized to deliver fuel to portable generators, which supply electrical power to the marina and maintenance building.

Boat repair occurs within the designated boat yard and maintenance area. Storm water discharges from these areas are regulated under a separate general NPDES permit.
